

SAMRIDDHI TRIPATHI

Full Stack Developer

9580883197 | tripathisamriddhi20@gmail.com | Lucknow, Uttar Pradesh | samriddhipf.vercel.app

PROFESSIONAL SUMMARY

B.Tech Information Technology student and full-stack developer passionate about building responsive, user-friendly web applications and blending design with functionality. Hands-on experience across React/Next.js, Node.js, and Python/Flask, with additional exposure to AI-integrated products. Shipped 6+ full-stack projects and placed in 3 competitive hackathons (2nd, 4th, and 5th positions). Currently a Full Stack Development Fellow at APYX, alongside a software development internship at Shri Ramswaroop Digital Technologies and a completed IBM virtual internship in web/mobile development and digital marketing.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Frontend: React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, Flask, REST APIs

Databases & ORM: PostgreSQL, MySQL, Prisma ORM

Auth & Deployment: NextAuth.js, Vercel

Design & Content: Canva, PowerPoint, Social Media Handling

Data & Tools: Excel, Google Sheets, GitHub

EXPERIENCE

Full Stack Development Fellow

Aug 2026 – Present

APYX | Remote

- Selected for the APYX Fellowship 2026, a project-based full-stack development program
- Contributing to product design, building intuitive user experiences, and creating wireframes and prototypes

Full-Stack Development Intern

Aug 2025 – Present

Shri Ramswaroop Digital Technologies Pvt. Ltd. | Lucknow

- Built real-world projects using Python, Flask, MySQL, and modern web technologies
- Developed frontend components, backend logic, and basic API integrations, improving practical skills in database management, version control, and UI responsiveness

Virtual Internship Trainee — Web, Mobile Development & Marketing

Jul 2025

IBM Developer Skills Network | Online

- Completed a certified virtual internship program focused on full-stack web/mobile development and digital marketing fundamentals

PROJECTS

Scholarly — School ERP Management System

- Built a production-ready, role-based ERP platform with dedicated dashboards for Admins, Faculty, and Students
- Implemented secure authentication with NextAuth.js (JWT sessions, bcrypt password hashing, password reset flow) and dual-layer role-based authorization (Edge Middleware + server-side guards)
- Designed a relational schema in PostgreSQL via Prisma ORM covering attendance, exams, marks, timetables, fees, and notices

Tech: Next.js 14, PostgreSQL, Prisma ORM, NextAuth.js, Tailwind CSS

SQUAWK — AI-Powered Aircraft Recovery System

- Designed a multi-agent AI system (Sourcing, Documentation, and Logistics agents, plus a Validator) to automate aircraft-on-ground (AOG) defect recovery

- Reduced a manual 7-step recovery process into an automated pipeline that turns a defect report into a vetted recovery plan in minutes, cross-checking pricing, compliance, and risk
- Preserved human final decision-making on airworthiness and maintenance, following an “AI suggests, human decides” model

RELAY — AI Emergency Interpreter

- Built an AI-powered emergency communication platform combining real-time voice AI, video-based emergency detection, GPS location tracking, and multilingual translation
- Implemented AI video triage to detect accidents, falls, injuries, and unusual inactivity, plus a nearest hospital/police finder with live navigation
- Integrated a responder bridge sharing incident summaries, location, medical signals, and conversation context with emergency responders in real time

SalesPilot AI — Autonomous AI Sales Employee

- Developed the voice AI and research layer of a 9-agent autonomous sales pipeline orchestrated end-to-end with LangGraph and FastAPI
- Built lead qualification, outreach generation, and simulated voice-call/WhatsApp conversation flows, plus a Kanban-style CRM pipeline and analytics dashboard
- Delivered a fully working demo requiring zero setup, built collaboratively as Team Cookies during a hackathon

Vintner Finance — Voice-Powered AI Finance Assistant

- Built a personal finance dashboard centered on a conversational voice AI assistant for hands-free balance checks and transaction logging
- Implemented spend-insight and savings-tip features with category-wise breakdowns, live analytics, and a real-time voice-call interface

FittyFit — Fitness Platform

- Collaborated with a team to design and build an innovative fitness platform during a hackathon, securing 4th position among more than 50 participating teams

HACKATHONS & ACHIEVEMENTS

- 2nd Position — NERDS ROOM: LAUNCH HACKS, AIMT Lucknow (Aug 2026): Built an AI Sales Agent platform helping businesses manage leads via AI-powered voice calls and WhatsApp conversations, within a single-day hackathon supported by FlutterFlow
- 4th Position among 50 teams — Inter College Hackathon: Built FittyFit, an innovative fitness platform, with a team
- 5th Position, \$100 Prize — HackWithUP 2.0 (RocketRide Buildathon), Lucknow: Advanced to the Grand Finale out of 500+ teams as Team TECHDIVAS

EDUCATION

B.Tech in Information Technology

2024 – 2028

Shree Ramswaroop Memorial College of Engineering

12th Class — PCM (CBSE)

2022 – 2024

Central Academy, Indira Nagar, Lucknow

10th Class (ICSE)

2020 – 2022

St. John's School, Jaunpur
